

“OHS AUDIT

There is a big difference between ‘hoping’ and ‘knowing’ that you are running a safe workplace and running an unsafe workplace can have serious legal and financial consequences.

An OHS Audit is conducted by an AW OHS Consultant using a comprehensive checklist compiled for retail businesses.

The checklist includes areas such as:

- Management responsibilities are defined.
- OHS Policy is in place.
- Planning
- Consultation
- Hazard Management
- OHS Training
- Housekeeping
- Storage
- Hazardous Substances
- First Aid
- Fire and Emergency Procedures
- Electricity
- Lighting
- Walkways and Floors
- Signs
- Ladders
- Manual Handling
- Personal Protective Equipment
- Security

Through the checklist the AW Consultant will determine any areas of non-compliance and make recommendations for corrective action.

This process will not only ensure a safe workplace but will also provide peace of mind and protection against possible prosecution.
