

“ARMED ROBBERY – PREVENTION AND SURVIVAL” (2.5 - 3 HOURS)

Is your business or organisation in a location that is vulnerable to armed robbery and:

- Are the team members trained in how to prevent an armed robbery?
- Do your cash handling procedures and practices minimise the opportunity for armed robbers?
- Are there features of your premises or practices that make you a soft target?
- Is your team trained in identifying and responding to suspicious behaviour?
- Are they trained in how to respond (physically and mentally) in an armed robbery?
- Are there team members who have more courage than knowledge and may do something with an armed robber that is illegal or puts them or others in danger?
- Could OHS officers find your workplace ‘unsafe’ because of a lack of preventative measures and staff training?

Would you like a cost-effective solution to this?

There is no activity in an organisation that can do more damage to your team than an armed hold-up. Not only is a loss of life a possibility but the potential trauma of an incident can damage your team members for life if they don’t have the knowledge, skills and training to handle it. Having untrained team members may also be construed as having an ‘unsafe’ workplace and make the organisation vulnerable to potential legal action and heavy fines under Occupational Health and Safety laws.

“**Armed Robbery – Prevention and Survival**” is a powerful, high quality training program that educates and empowers team members in how to prepare for and respond in an armed hold-up situation. Topics include:

- Precautions to reduce the chances of being robbed
- How to act in life-threatening situations
- What to do immediately after the robbery
- Offender information
- Understanding post trauma stress and how to deal with it

An optional service that complements this program is:

- An **Armed Robbery Audit** where an AUSTRALIAWIDE Security Consultant examines your premises as well as your procedures and practices to identify where improvements are required.

TESTIMONIAL

“I now feel comfortable and confident in the event of an armed robbery. Our shop has had armed robberies before. The content was very clear and provided a lot of useful information.”

Shop Assistant, Kelmscott, WA
